## **A-WALL™ MODULAR TANNING ROOMS**

# A-WALL™ MODULAR TANNING ROOMS

## From Concept to Completion in Just Weeks!

A-WALL combines the look and feel of permanent walls with the speed and flexibility of a demountable partition. Completely pre-engineered to the specific needs of your salon, A-WALL arrives on-site ready for fast assembly. All components are factory prepared and marked to match detailed, assembly drawings. This means your salon can be complete within days after your components arrive. With A-WALL, you can achieve the appearance and durability of conventional stud and drywall, without the delay and mess.

Electrical Wiring Cavities

\*Firecode C\* Gypsum Board or  
High Density Melamine Board

**A-WALL Panels Have the Appearance and  
Performance of Stud and Drywall Partitions**

### Factory Wired Panels

A-WALL panels can be factory wired with convenience outlets and data boxes for even faster installations. All wiring is done in accordance with the National Electrical Code using UL Classified devices.

### Durable, Washable Panel Finishes

Choose from decorator vinyl finished gypsum or high density melamine panels. Unfinished gypsum panels that can be field painted or papered to your specific color scheme are also available.

### Pre-finished or Paintable Commercial Doors

A-WALL modular tanning rooms use only 1-3/4", commercial grade doors. This means you'll enjoy years of trouble free service. Prefinished, oak or walnut legacy doors arrive ready for service. Raised panel, paintable doors are also available in several styles. Each door comes complete with a lever-type, privacy lock and all necessary hardware.

### Design Assistance & Comprehensive Quotations

A simple sketch of your salon layout is all that's required to receive a detailed quotation. It will include an accurate assembly time estimate, shipping weight and freight costs.
